# METALLURGIA—Index to Volume LIX

*Published by the Kennedy Press Ltd., 31 King Street West, Manchester 3.*

## JANUARY—JUNE, 1959

*Page*

### LEADERS

Cobalt. . . . . 55
Electric Steel Melting. . . . . 213
Research and Technical Institutions. . . . . 107–108
Steel Outlook. . . . . 1
The Technologist and Management . . . . . 159
Training Metallurgists. . . . . 263

### ARTICLES

A

ACE, A Guide to. N.P.L.'s New Electronic Computing Machine. . . . . 144
"Active Iron," Investigations on. Part I—Isolation. By Dr. G. V. L. N. Murty. . . 141–142
Adhesion of Bearing Metal to Steel, The Effect of Surface Preparation on the. By C. J. Thwaites. . . . . 121–124
Aluminium and its Alloys in 1958. Some Aspects of Research and Technical Progress Reported. By E. Elliott. . . . . 79–85, 109–116
Aluminium Alloys, Trends in Production of Castings in. By A. P. Fenn. . . . . 63–66
Aluminium, Vitreous-Enamelled. A New Architectural Material. . . . . 303–304
Aluminium Alloys, Welding Structural. . . . . 247–248
Aluminium as a Building Material, The Progress of. By E. H. Laithwaite. . . . . 74–78
Aluminium (Clad) Alloys. By F. C. Porter. . . . . 67–73
Aluminium Forging Production. 39–40
Aluminium Tubes (Extruded), Annealing. . . . . 194
Annealing Extruded Aluminium Tubes. . . . . 194
Automatic Manufacture of Bearings. Timken Roller Bearings' Bucyrus Plant. . . 13–16
Axle Shafts, Hardening. G.W.B. Installations at Standard Motors. . . . . 85

B

Basic Sizes for Sheet, Strip and Wire. . . . . 87
Bearing Metal to Steel, The Effect of Surface Preparation on the Adhesion of. By C. J. Thwaites. . . . . 121–124
Bearings, Automatic Manufacture of. Timken Roller Bearings' Bucyrus Plant . . 13–16
Binary and Ternary Alloys of Tin with the Elements of Groups IIB IIIB and VB of the Periodic Table. By H. W. Rayson, C. W. Goulding and G. V. Raynor. . . . . 57–62, 125–130
Blast Furnace (New) Commissioned at Margam. . . . . 302–303
B.N.F.M.R.A.'s New Laboratory Block Opened. . . . . 269–274
Building Material, The Progress of Aluminium as a. By E. H. Laithwaite. . . . . 74–78

C

Carburising, High Temperature. By H. P. Ipsen. . . . . 176–180
Casting Pit Refractories, Production of. New Tunnel Kiln Commissioned. . . . . 245–246
Castings in Aluminium Alloys, Trends in Production of. By A. P. Fenn. . . . . 63–66
Cast Outboard Motor Crankshafts. . . . . 174–175
Cast Stainless Steels, The Low-Temperature Mechanical Properties of Some Cast. By G. Mayer and Dr. K. Balajiva. . . 221–226
Chrome Plating, Titanium Heating Coils in. . . . . 130
Clad Aluminium Alloys. By F. C. Porter. . . . . 67–73
Coiled Tinplate. . . . . 160
Compaction (Continuous) of Titanium, Molybdenum and Tungsten, Some Preliminary Experiments on the. By Dr. P. Evans and G. C. Smith. . . 117–120
Computing Machine (Electronic), N.P.L.'s. ACE, A Guide to. . . 144
Continuous Compaction of Titanium, Molybdenum and Tungsten, Some Preliminary Experiments on the. By Dr. P. Evans and G. C. Smith. . . 117–120
Copper and Copper Alloys. A Survey of Technical Progress during 1958. By Dr. E. Voce. 88–92, 131–138
Copper Strand, Unusual Fracturing of Hard-Drawn High-Conductivity. By. C. Blazey. 237–240
Crankshafts, Cast Outboard Motor. . . . . 174–175
Curves (Relaxation Stress-Time) from Static Tensile Test Data, Note on the Prediction of. By A. E. Johnson, J. Henderson and V. D. Mathur. . . . . 215–220

D

Deposition of Nickel by Thermal Decomposition of Nickel Carbonyl at Low Pressures, Observations on the Process of. By L. W. Owen. 165–173, 227–233, 295–301
Dry Corrosion of Nimonic 80A by Peat Ash, Studies on the. By J. A. Waddams and Dr. J. C. Wright. . . . . 161–164

E

Electric Arc Steelmaking Using Hot Metal Process. Pre-refining Technique Developed at Brymbo. . . . . 265–268
Electronic Computing Machine. N.P.L.'s ACE, A Guide to. 144
Enamels, Sheet Iron. . . . . 236
Endurance and Progressive Loading Tests, Notch Sensitivity and Directionality in Fatigue in Light Alloy Extrusion as Shown by. By Dr. J. McKeown. . . . . 31–38
Excavator Parts, Flame Hardening. . . . . 181–182, 184
Extruded Aluminium Tubes Annealing. . . . . 194

F

Fatigue (Notch Sensivity and Directionality in) in Light Alloy Extrusions as Shown by Endurance and Progressive Loading Tests. By Dr. J. McKeown. . . . . 31–38
Flame-Hardening Excavator Parts. . . . . 181–182, 184
Forging (Aluminium) Production. 39–40
Fracturing (Unusual) of Hard-Drawn High-Conductivity Copper Strand. By C. Blazey. 237–240
Furnace (Heat Treatment) Installations, Recent. Annual Survey of Developments. . . 275–294

G

Growth of Sintered Metal Compacts. By J. E. Elliott. . . 17–27

H

Hacksaw and Magnet Production. Cutler's Feast Works Visit. . . . . 195–198
Hard-Drawn High-Conductivity Copper Strand, Unusual Fracturing of. By C. Blazey. . . 237–240
Hardening Axle Shafts. G.W.B. Installation at Standard Motors. . . . . 85
Heating Coils (Titanium) in Chrome Plating. . . . . 130
Heat Treatment Furnace Installations, Recent. Annual Survey of Developments. . . . 275–294
High Speed Steels, An Early Worker on. Maunsel White. By E. N. Simons. . . . . 10–12
High Temperature Carburising. By H. P. Ipsen. . . . . 176–180
Honours List, New Year. . . . . 40, 16
Hot Metal Process, Electric Arc Steelmaking Using. Pre-refining Technique Developed at Brymbo. . . . . 265–268

I

Iron Casting in Steam Engineering. . . . . 304

L

Laboratory Block (New) Opened. Improved facilities for B.N.F.-M.R.A. . . . . 269–274
Light Alloy Extrusions, Notch Sensitivity and Directionality in Fatigue in, as Shown by Endurance and Progressive Loading Tests. By Dr. J. McKeown. . . . . 31–38
Loading Tests (Progressive), Notch Sensitivity and Directionality in Fatigue in Light Alloy Extrusions as Shown by Endurance and. By Dr. J. McKeown. . . . . 31–38
Low Pressures, Observations on the Process of Nickel Deposition by Thermal Decomposition of Nickel Carbonyl at. By L. W. Owen. . . . . 165–173, 227–233, 295–301
Low-Temperature Mechanical Properties of Some Cast Stainless Steels, The. By G. Mayer and Dr. K. Balajiva. . . . . 221–226

M

Magnet and Hacksaw Production. Cutler's Feast Works Visit. . . 195–198
Maunsel White. An Early Worker on High Speed Steels. By E. N. Simons. . . . . 10–12
Medium Width Steel Strip Rolling. . . . . 3–9

Page

Metal Compacts (Sintered), Growth of. By J. E. Elliott. 17–27
Molybdenum, Titanium and Tungsten, Some Preliminary Experiments on the Continuous Compaction of. By Dr. P. Evans and G. C. Smith. .. .. 117–120

N

National Physical Laboratory's New Electronic Computing Machine—ACE. .. .. .. 144
Nickel Carbonyl, Observations on the Process of Nickel Deposition by Thermal Decomposition of, at Low Pressures. By By L. W. Owen. .. .. .. 165–173, 227–233, 295–301
Nickel Deposition by Thermal Decomposition of Nickel Carbonyl at Low Pressures, Observations on the Process of. L. W. Owen. .. .. .. .. 165–173, 227–233, 295–301
Nickel Supplies. .. .. .. 268
Nimonic 80A, Studies on the Dry Corrosion of, by Peat Ash. By J. A. Waddams and Dr. J. C. Wright. .. .. .. .. 161–164
Niobium (Columbium)—Its Future Prospects. By J. Sandor. 185–194
Notch Sensitivity and Directionality in Fatigue in Light Alloy Extrusions as Shown by Endurance and Progressive Loading Tests. By Dr. J. McKeown. .. .. .. .. 31–38

O

Oxy-Town-Gas Equipment at Ruston-Bucyrus. Flame-Hardening Excavator Parts... 181–182, 184

P

Peat Ash. Studies on the Dry Corrosion of Nimonic 80A By J. A. Waddams and Dr. J. C. Wright. .. .. .. .. .. 161–164
Pilot Plant Laboratory Block, United Steel's. Equipment for Fuel and Furnace Research. .. 234–236
Prediction of Relaxation Stress-Time Curves from Static Tensile Test Data. Note on the. By A. E. Johnson, J. Henderson and V. D. Mathur. .. .. 215–220
Preheat Temperatures, Regenerators and. .. .. .. 143
Pre-refining Technique Developed at Brymbo. Electric Arc Steelmaking Using Hot Metal Process. .. .. .. .. .. 265–268
Pyrometer, New Radiation. Temperature Measurement in Induction Hardening. .. .. 86–87

R

Radiation Pyrometer, New. Temperature Measurement in Induction Hardening. .. .. 86–87
Refractories, Production of Casting Pit. New Tunnel Kiln Commissioned... .. .. .. 245–246
Regenerators and Preheat Temperatures... .. .. .. .. 143
Relaxation Stress-Time Curves from Static Tensile Test Data. Note on the Prediction of. By A. E. Johnson, J. Henderson and V. D. Mathur. .. .. .. 215–220
Rolling Medium Width Steel Strip. .. .. .. .. .. 3–9
Rolling Mill Control Demonstration Van. .. .. .. .. .. 198

S

Page

Science Museum's New Iron and Steel Gallery. .. .. .. 173
Semi-Conductor Grade Silicon Production. .. .. .. .. 138
Sheet Iron Enamels. .. .. 236
Sheet, Strip and Wire, Basic Sizes for. .. .. .. .. .. 87
Shell Moulding. Cast Outboard Motor Crankshafts.. .. .. 174–175
Silicon Production, Semi-Conductor Grade. .. .. .. .. 138
Sintered Metal Compacts, Growth of. By J. E. Elliott. 17–27
Spanish Steel Industry, Expansion of. New ENSIDESA Melting Shop at Aviles Commissioned. .. .. .. .. 139–140
Stainless Steels (Cast), The Low-Temperature Mechanical Properties of Some. By G. Mayer and Dr. K. Balajiva. .. .. 221–226
Standards (British), New and Revised. .. .. .. .. .. 226
Static Tensile Test Data, Note on the Prediction of Relaxation Stress-Time Curves from. By A. E. Johnson, J. Henderson and V. D. Mathur. .. .. .. 215–220
Steam Engineering, Iron Castings in. .. .. .. .. .. 304
Steel (Cast) Outboard Motor Crankshafts. .. .. .. .. 174–175
Steel Strip (Medium Width) Rolling. .. .. .. .. .. 3–9
Steel, The Effect of Surface Preparation on the Adhesion of Bearing Metal to. By C. J. Thwaites. .. .. .. .. 121–124
Steel Works Expansion. Stage I Completed by Arthur Balfour & Co., Ltd. .. .. .. 28–30
Stress Relieving in Situ. Novel Use of Mineral Wool Insulation. .. .. .. .. .. 183–184
Structural Aluminium Alloys, Welding. .. .. .. .. 247–248
Surface Preparation (The Effect of) on the Adhesion of Bearing Metal to Steel. By C. J. Thwaites. .. .. .. .. 121-124

T

Ternary and Binary Alloys of Tin with the Elements of Groups IIB, IIIB and VB of the Periodic Table. By H. W. Rayson, C. W. Goulding and G. V. Raynor. .. .. .. .. 57–62, 125–130
Thermal Decomposition of Nickel Carbonyl at Low Pressures, Observations on the Process of Nickel Deposition by. By L. W. Owen. .. .. .. .. 165–173, 227–233, 295–301
Timken Roller Bearings' Bucyrus Plant. .. .. .. .. .. 13–16
Tin, Binary and Ternary Alloys of, with the Elements of Groups IIB, IIIB and VB of the Periodic Table. By H. W. Rayson, C. W. Goulding and G. V. Raynor. .. .. .. .. 57–62, 125–130
Tinplate, Coiled. .. .. .. 160
Titanium Heating Coils in Chrome Plating. .. .. .. 130
Titanium, Molybdenum and Tungsten, Some Preliminary Experiments on the Continuous Compaction of. By Dr. P. Evans and G. C. Smith. .. 117–120
Tungsten, Titanium and Molybdenum, Some Preliminary Experiments on the Continuous Compaction of. By Dr. P. Evans and G. C. Smith. 117–120

U

Page

## LABORATORY METHODS

| | Page |
|---|---|
| Alloy Analysis, Some Aspects of Potentiometric Titrations in. By D. R. W. McLaren. | 257–261 |
| Aluminium, A Composite Procedure for the Colorimetric Determination of Eleven Elements in. By M. C. Steele and L. J. England. | 153–156 |
| Analysis (Alloy), Some Aspects of Potentiometric Titrations in. By D. R. W. McLaren. | 257–261 |
| Beryllium Metal, The Rapid Determination of Beryllium Oxide in. By A. R. Eberle and M. W. Lerner. | 49–52 |
| Cadmium (The Determination of) in Zinc Anodes. By W. C. G. Wheeler and D. Durant. | 43–54 |
| Cobalt Container (High Intensity) for Industrial Radiography. | 311–312 |
| Cobalt Metal, Oxide and Sulphide, Metallographic Differentiation of. By Dr. R. S. Young | 210 |
| Colorimetric Determination of Eleven Elements in Aluminium, A Composite Procedure for the. By M. C. Steele and L. J. England. | 153–156 |
| Differential Pressure Meter, The Ring Balance. By T. C. Toye. | 209–210 |
| Differentiation (Metallographic) of Cobalt Metal, Oxide and Sulphide. By Dr. R. S. Young. | 210 |
| High Intensity Cobalt Container for Industrial Radiography. | 311–312 |
| Metallographic Differentiation of Cobalt Metal, Oxide and Sulphide. By Dr. R. S. Young. | 210 |
| Niobium (Rapid Determination of) in Stainless Steel. By R. St. J. Emery. | 101–103 |
| Physicial Society's Exhibition, Exhibits of Metallurgical Interest at the. | 104–106, 157–158, 211–212, 261–262, 313–314 |
| Potentiometric Titrations in Alloy Analysis, Some Aspects of. By D. R. W. McLaren. | 257–261 |
| Radiography (Industrial), A High Intensity Cobalt Container for. | 311–312 |
| Rapid Determination of Beryllium Oxide in Beryllium Metal, The. By A. R. Eberle and M. W. Lerner. | 49–52 |
| Rapid Determination of Niobium in Stainless Steel. By R. St. J. Emery. | 101–103 |
| Ring Balance Differential Pressure Meter, The. By T. C. Toye. | 209–210 |
| Stainless Steel, Rapid Determination of Niobium in. By R. St. J. Emery. | 101–103 |
| Steel (Stainless), Rapid Determination of Niobium in. By R. St. J. Emery. | 101–103 |
| Titrations (Potentiometric) in Alloy Analysis, Some Aspects of. By D. R. W. McLaren. | 257–261 |
| Zinc Anodes, The Determination of Cadmium in. By W. C. G. Wheeler and D. Durant. | 53–54 |

ARTICLES

A

"Ajax" Furnace Conversion (Second) at Appleby-Frodingham .. .. .. .. .. .. 22
All-Electric Melting Shop Planned. Steel, Peech and Tozer Branch of the United Steel Cos., Ltd. .. .. .. 218
Aluminium Alloys (2L40 and D.T.D. 683), The Effect of Pickling and Anodising on the Fatigue Properties of. By J. M. Finney. .. .. .. .. 93–101
Aluminium Cladding for Buildings, Exhibition of .. .. 20
Aluminium for Sub-Zero Methane 16
Aluminium, Intermediate Annealing of. New Plate Furnace Installation .. .. 21–22
Aluminium in the "Oriana." Thousand Ton Welded Superstructure .. .. .. .. .. 217–218
Aluminium Sheet Production in North Wales .. .. .. .. 275–276
Aluminium-Tin Alloys for Bearings .. .. .. .. .. .. 267
Aluminized Steel—Its Properties and Uses. By K. G. Coburn .. 17–20
Annealing, Intermediate, of Aluminium. New Plate Furnace Installation .. .. .. .. 21–22
Anodising Electrolyte, The Use of Malonic Acid as an. By J. M. Kape .. .. .. .. .. 181–191
Anodising and Pickling (The Effect of) on the Fatigue Properties of 2L40 and D.T.D. 683 Aluminium Alloys. By J. M. Finney .. .. .. .. 93–101
Antifreeze and Corrosion. British Cast Iron Research Association 212
Arc Furnace (Electric), Distribution of Electrode Consumption in an. By J. Ravenscroft and M. Preston .. .. .. 253–259

B

Bearings, Aluminium-Tin Alloys for .. .. .. .. .. .. 267
B.I.S.R.A. London Laboratories' Open Days .. .. 213–216, 269–274
Boron, Zone Melting Facilitated. New Technique for Pressing Rods .. .. .. .. .. 200
Brazing Titanium and its Alloys. Silver-Aluminium Alloys for. By H. C. Davis .. .. .. 205–211
Brearley, Harry. By E. N. Simons .. .. .. .. .. 54–56
British Cast Iron Research Association. Open Days .. .. 44–47
Experimental Cupola Installation .. .. .. .. .. 12–16
B.W.R.A. Open Day. Research on Welding Processes and Welded Products .. .. .. 81–85

C

Cast Iron from Steel Scrap .. 261–262
Chromium Diffusion (The Influence of) upon the Thermal Oxidation Properties of Steel and of Nickel- and Cobalt-Base Alloys. By R. L. Samuel and Dr. T. P. Hoar .. .. .. 75–80
Chromium Plating, Improving the Quality of .. .. .. .. 191
Cladding (Stainless) for New Laboratory .. .. .. .. 157–158
Closed Quench Furnace, Vertical Cylindrical .. .. .. .. 192
Cobalt-Base Alloys, The Influence of Chromium Diffusion upon the Thermal Oxidation Properties of Steel and of Nickel- and. By R. L. Samuel and Dr. T. P. Hoar .. .. 75–80
Columbium or Niobium, The Metal Called. By M. Schofield 127–128
Control and Heat Treatment (New) for Holman Group .. 143–144
Controls (Scientific) in Works. By Dr. L. H. Callendar .. 133–136
Conveyor System in the New Paint, Trim and Assembly Building of the Ford Motor Co., Ltd. .. .. .. .. .. .. 153–155
Copper-Aluminium-Cobalt Alloys, Mechanical Properties Obtainable by Precipitation-Hardening Treatments in a Range of. By Dr. J. P. Dennison .. .. .. .. .. 129–132
Copper and Copper Alloys. A Survey of Technical Progress During 1959. By E. Voce .. 247–252
Corrosion and Antifreeze. British Cast Iron Research Association 212
Corrosion (Fretting) of Metals. By Dr. R. T. Allsop .. .. 87–92
Corrosion of Iron and Steel, The. Twenty Years' Research Reported by Corrosion Committee 85–86
Cupola Installation (Experimental), The B.C.I.R.A. .. 12–16
Cylindrical Closed Quench Furnace, Vertical .. .. .. 192

D

Dowlais, Modern Ingot Mould Foundry at .. .. .. .. 48–50

E

Electric Arc Furnace, Distribution of Electrode Consumption in an. By J. Ravenscroft and M. Preston .. .. .. 253–259
Electric Lamp Filaments, Tungsten for. By D. J. Jones and A. Leach .. .. .. .. .. 7–11
Electric Steelmaking Plant, New. Brymbo .. .. .. .. .. 3–6
Electrochemistry, Sign Conventions in. By Dr. J. M. West .. 145–146
Electrode Consumption (Distribution of) in an Electric Arc Furnace. By J. Ravenscroft and M. Preston .. .. .. 253–259
Electromagnet Core, 7,000 ton .. 35–38
Electro-Magnetic Liquid Metal Pump Channel (Failed), Metallurgical Examination of a. By G. H. Broomfield .. .. .. 201–203
Extrusion of Metals, Research on the. Progress at the National Engineering Laboratory .. 160
Extrusion of Non-Ferrous Metals, Factors Affecting Temperature During The. By A. R. E. Singer and J. W. Coakham .. 239–246

F

Failed Electro-Magnetic Liquid Metal Pump Channel, Metallurgical Examination of a. By G. H. Broomfield .. .. .. 201–203
Fatigue Properties of 2L40 and D.T.D. 683 Aluminium Alloys, The Effect of Pickling and Anodising on the. By J. M. Finney .. .. .. .. .. 93–101
Ford Motor Co., Ltd., Conveyor System in the New Paint, Trim and Assembly Building of the 153–155
Foundry (Modern Ingot Mould) at Dowlais .. .. .. .. 48–50
Fretting Corrosion of Metals. By Dr. R. T. Allsop .. .. .. 87–92
Furnace Conversion (Second "Ajax") at Appleby-Frodingham .. .. .. .. .. .. 22
Furnace (Electric Arc), Distribution of Electrode Consumption in an. By J. Ravenscroft and M. Preston .. .. .. 253–259
Furnace, Vertical Cylindrical Closed Quench .. .. .. 192

H

Heat Treatment and Control Department (New) for Holman Group .. .. .. .. .. 143–144
Heat Treatment in Nitrogen-Hydrogen Atmospheres. Applications of Nitroneal Generator 268
High Temperature Refractories, Exhibition of .. .. .. .. 11

I

Ingot Mould Foundry, Modern, at Dowlais .. .. .. .. 48–50
Intermediate Annealing of Aluminium. New Plate Furnace Installation .. .. .. .. 21–22
Iron and Steel Research. B.I.S.R.A. London Laboratories' Open Days .. .. .. 213–216
Iron and Steel Research .. .. 269–274

J

Jarrow, The Renaissance of. Socio-Industrial Venture Comes of Age .. .. .. .. 106

L

Liquid Metal Pump Channel, Metallurgical Examination of a Failed Electro-Magnetic. By G. H. Broomfield .. .. .. 201–203
Low Pressure Metallurgy. A General Survey. By Dr. A. S. Darling .. 137–143, 193–199, 263–267

M

Magnesium, Introducing Zirconium into. New Metallic Hardener Alloy Available .. 159
Magnet Sectors for 7 GeV Proton Synchrotron, Production of .. 35–38
Malonic Acid (The Use of) as an Anodising Electrolyte. By J. M. Kape .. .. .. .. 181–191
Management Training, Steel Industry. Residential College Established at Ashorne Hill .. 51–53
Mechanical Properties Obtainable by Precipitation Hardening Treatments in a Range of Copper-Aluminium-Cobalt Alloys. By Dr. J. P. Dennison. 129–132
Metal Called Columbium or Niobium. By M. Schofield .. 127–128

Page

Metallic Hardener Alloy (New) Available. Introducing Zirconium into Magnesium .. 159
Metallurgical Examination of a Failed Electro-Magentic Liquid Metal Pump Channel. By G. H. Broomfield .. .. .. 201–203
Mineral Dressing Laboratory. G.E.C. Transfer Activities to Erith .. .. .. .. .. 151–152
Molten Metals, Low Cost Refining of. Birlefco Installation in Birmingham .. .. .. .. 204, 211

N

National Engineering Laboratory, Progress at the. Research on the Extrusion of Metals .. 160
Nickel- and Cobalt-Base Alloys, The Influence of Chromium Diffusion upon the Thermal Oxidation Properties of Steel and of. By R. L. Samuel and Dr. T. P. Hoar .. .. .. 75–80
Niobium or Columbium, The Metal Called. By M. Schofield 127–128
Nitrogen-Hydrogen Atmospheres, Heat Treatment in. Applications of Nitroneal Generator .. .. .. .. .. 268
Nitroneal Generator, Applications of. Heat Treatment in Nitrogen-Hydrogen Atmospheres .. .. .. .. .. 268
Non-Ferrous Metals, Factors Affecting Temperature During the Extrusion of. By A. R. E. Singer and J. W. Coakham .. 239–246

O

"Oriana," Aluminium in the. Thousand Ton Welded Superstructure .. .. .. .. .. 217–218

P

Paint, Trim and Assembly Building (New) of the Ford Motor Co., Ltd., Conveyor System in the .. .. .. .. .. .. 153–155
Photography (Advanced) Scholarships .. .. .. .. 57
Pickling and Anodising (The Effect of) on the Fatigue Properties of 2L40 and D.T.D. 683 Aluminium Alloys. By J. M. Finney .. .. .. .. 93–101
Precipitation-Hardening Treatments in a Range of Copper-Aluminium-Cobalt Alloys, Mechanical Properties Obtainable by. By Dr. J. P. Dennison 129–132
Pressing Rods. Zone Melting of Boron Facilitated .. .. .. 200
Proton Synchrotron, 7 GeV, Production of Magnet Sectors for .. .. .. .. .. .. 35–38
Pump Channel (Failed Electro-Magnetic Liquid Metal), Metallurgical Examination of a. By G. H. Broomfield .. .. .. 201–203

Q

Quench Furnace, Vertical Cylindrical Closed .. .. .. .. 192

R

Reactor Pressure Vessel, Stress Relief of .. .. .. .. .. 156–157
Refining of Molten Metals, Low Cost. Birlefco Installation in Birmingham .. .. .. .. 204, 211
Refractories, Exhibition of High Temperature .. .. .. .. 11
Research, An Experiment in. Progress at Pioneer British Sponsored Research Institute 102–105
Rigidal Seamwall on Show .. 20

S

Scientific Controls in Works. By Dr. L. H. Callendar .. .. 133–136
Scrap Steel, Cast Iron from .. 261–262
Sign Conventions in Electrochemistry. By Dr. J. M. West 145–146
Silver-Aluminium Alloys for Brazing Titanium and its Alloys. By H. C. Davis .. 205–211
Socio-Industrial Venture Comes of Age. The Renaissance of Jarrow .. .. .. .. .. 106
Stainless Cladding for New Laboratory .. .. .. .. .. 157–158
Standards, British .. .. 6, 47, 191
Steel, Aluminized,—Its Properties and Uses. By K. G. Coburn .. .. .. .. .. 17–20
Steel and of Nickel- and Cobalt-Base Alloys, The Influence of Chromium Diffusion upon the Thermal Oxidation Properties of. By R. L. Samuel and Dr. T. P. Hoar .. .. .. .. 75–80
Steel Industry Management Training. Residential College Established at Ashhorne Hill 51–53
Steel Scrap, Cast Iron from .. 261–262
Steelmaking Plant, Electric. Brymbo .. .. .. .. .. 3–6
Stress Relief of Reactor Pressure Vessel .. .. .. .. .. 156–157
Synchrotron, 7 GeV Proton, Production of Magnet Sectors for .. .. .. .. .. .. 35–38

T

Temperature (Factors Affecting) During the Extrusion of Non-Ferrous Metals. By A. R. E. Singer and J. W. Coakham .. 239–246
Thermal Oxidation Properties of Steel and of Nickel- and Cobalt-Base Alloys, The Influence of Chromium Diffusion upon the. By R. L. Samuel and Dr. T. P. Hoar .. .. .. .. .. 75–80
Thorium Plant (Canada's First) in Operation .. .. .. .. 156
Titanium and its Alloys, Silver-Aluminium Alloys for Brazing. By H. C. Davis .. .. .. 205–211
Titanium-Clad Vessels .. .. 268
Tube Investments Research Laboratories. Work in Progress at Hinxton Hall .. .. .. 147–150
Tungsten for Electric Lamp Filaments. By D. J. Jones and A. Leach .. .. .. .. .. 7–11

V

Vertical Cylindrical Closed Quench Furnace .. .. .. 192

W

Weld Defects, Significance of .. 260
Welding Processes and Welded Products, Research on. B.W.R.A. Open Day .. .. 81–85

Z

Zirconium (Introducing) into Magnesium. New Metallic Hardener Alloy Available .. 159
Zone Melting of Boron Facilitated. New Technique for Pressing Rods. .. .. .. 200

LABORATORY METHODS

Cable Sheath Materials (Lead) for Microscopical Metallography, The Preparation of. By P. Gregory, A. J. Bangay and R. Paris .. .. .. .. 233–236
Cambridge Instrument Company's New Research Block Opened .. .. .. .. .. 177–178
Cast Iron, The Determination of Sulphur in. By H. Green .. 229–232
Cell (A Simple Flow-Through) for Use with the Unicam SP.600 Spectrophotometer. By C. J. Keattch and P. W. Wright .. .. .. .. .. 118
Chemical Methods. The Analysis of Nickel. Part I. By T. R. Andrew and C. H. R. Gentry .. 27–30, 69–72, 121–124, 173–176
Combustion Method (A Study of the) with an Assessment of the Value of Vanadium Pentoxide as Flux—The Determination of Sulphur in Cast Iron. By H. Green .. .. .. .. .. 229–232
Dilute Alloys of Lead, A Method of Electro-polishing. By P. Gregory, K. M. Ginsburg and R. J. G. Woods .. .. .. 171–172
Electro-polishing Dilute Alloys of Lead, A Method of. By P. Gregory, K. M. Ginsburg and R. J. G. Woods .. .. .. 171–172
Evaluation (The Routine) of Raw Titanium. By P. S. Crowther and H. Bradley .. 287–292
Flow-Through Cell (A Simple) for Use with the Unicam SP.600 Spectrophotometer. By C. J. Keattch and P. W. Wright .. .. .. .. .. 118
Flux, A Study of the Combustion Method with an Assessment of the Value of Vanadium Pentoxide as.—The Determination of Sulphur in Cast Iron. By H. Green .. .. .. .. 229–232
Hardness Testing (Indentation), Test Blocks for. By Mrs. J. G. Wood .. .. .. .. .. 115–118
Hardness, The Practical Realisation of the HV and HR Scales of. By R. S. Marriner .. .. 63–68
HV and HR Scales of Hardness, The Practical Realisation of the. By R. S. Marriner. .. 63–68
Indentation Hardness Testing, Test Blocks for. By Mrs. J. G. Wood .. .. .. .. .. 115–118
Laboratory for Nuclear Metals, Inc. .. .. .. .. .. 119–120, 124
Lead, A Method of Electro-polishing Dilute Alloys of. By P. Gregory, K. M. Ginsburg and R. J. G. Woods .. .. 171–172
Lead Cable Sheath Materials for Microscopical Metallography, The Preparation of. By P. Gregory, A. J. Bangay and R. Paris .. .. .. .. .. 233–236
Metallography (Microscopical), The Preparation of Lead Cable Sheath Materials for. By P. Gregory, A. J. Bangay and R. Paris .. .. .. .. .. 233–236
Microscopical Metallography, The Preparation of Lead Cable Sheath Materials for. By P. Gregory, A. J. Bangay and R. Paris .. .. .. .. .. 233–236

Page

Nickel, The Analysis of. Part I—Chemical Methods. By T. R. Andrew and C. H. R. Gentry .. 27–30, 69–72, 121–124, 173–176
Physical Society's Exhibition, Exhibits of Metallurgical Interest at the .. .. .. 31–32
Raw Titanium, The Routine Evaluation of. By P. S. Crowther and H. Bradley .. 287–292
Research Laboratories (New) of the Cambridge Instrument Co., Ltd. .. .. .. .. .. 177–178
Routine Evaluation of Raw Titanium, The. By P. S. Crowther and H. Bradley .. 287–292
Spectrophotometer (Unicam SP.600), A Simple Flow-Through Cell for Use with the. By C. J. Keattch and P. W. Wright .. .. .. .. .. 118
Sulphur in Cast Iron, The Determination of. By H. Green .. .. .. .. .. 229–232
Test Blocks for Indentation Hardness Testing. By Mrs. J. G. Wood .. .. .. .. 115–118
Titanium (Raw), The Routine Evaluation of. By P. S. Crowther and H. Bradley .. 287–292
Unicam SP.600 Spectrophotometer, A Simple Flow-Through Cell for Use with the. By C. J. Keattch and P. W. Wright .. .. .. .. .. 118
Vanadium Pentoxide as Flux, A Study of the Combustion Method with an Assessment of the Value of.—The Determination of Sulphur in Cast Iron. By H. Green .. .. 229–232
